What Is Gamestar Mechanic?

Gamestar Mechanic is a game-based learning platform and curriculum created to teach students the principles of game design as a form of 21st Century skill building.

Gamestar helps students develop the technological, artistic, cognitive, social, and linguistic skills that they will need to thrive in the 21st Century, including:

- Systems Thinking
- Critical Thinking
- Problem Solving
- Creativity & Innovation
- Iterative Design
- Collaboration & Communication
- Digital Media Literacy
- Motivation for STEM learning

The enthusiasm with which students embrace these complex concepts, when presented in the context of videogame creation, is truly remarkable.

Gamestar Mechanic is currently supported by a partnership between the Institute of Play and E-Line Media. Initial funding for the game and companion learning guides came from the John D. and Catherine T. MacArthur Foundation.

“Gamestar Mechanic gives students a sense of mastery and confidence. It was exciting to see previously disengaged students become peer mentors.”

- Chelsea Nilsson, Dean of Instruction, KIPP Philadelphia Charter School
Quests
An exciting adventure that scaffolds your students through the core principles of game design as they earn sprites to make games.

Workshop
Drag-and-drop digital tools that students will use to make their own games using the sprites they earn in the Quests.

Game Alley
A social community where students publish their own games, review the games of others and enter exciting design competitions.

“When we first starting using Gamestar Mechanic we thought it was a revolution in education. Games are a major part of the lives of today’s youth, a major part of the media they consume. Having them look at games critically – not just as consumers but as producers – it’s transformative.”

-- Barry Joseph, Director, Global Kids Online Leadership Program, NYC
“Gamestar Mechanic is an amazing student-centered resource for schools that can be used as enrichment, as part of a media literacy course, and to fulfill STEM objectives. Gamestar Mechanic helped to make my classroom a student-driven, collaborative environment where students felt like they were the experts in a matter of minutes!”

- Danielle Ongart, Teacher, New Heights Academy

**grade**

Gamestar Mechanic has been specifically designed for students from 4th grade to 9th grade, but has been successfully used with younger and older students.

**setting**

Gamestar Mechanic was designed to work in both formal and informal learning environments including schools, after-school programs, home schools, libraries, community centers, tutoring centers, museums & camps.

**curriculum**

The Gamestar Mechanic Learning Guide designed by the Institute of Play offers a flexible curriculum that ranges from a single session media lab activity to a semester-long game design elective.

**platform**

Gamestar Mechanic is a browser-based program (no special downloads required) that works with all common PC and Mac browsers. Gamestar requires an Internet connection and the Flash 10 (or later) browser plug-in.
A **free** version of Gamestar Mechanic with a robust online curriculum is available for unlimited use by educators who wish to gain experience using the platform with their students.

**Premium Educational Packages** are also available that include:
- professional training (live webinar)
- tools for managing student accounts
- tools for tracking student activities and assessing progress
- higher levels of customer support and technical support
- the option of having a private “walled” online community for your organization

---

**Class License**
