Teaching STEM to Young Children: An International Perspective

On May 31–June 1, the Joan Ganz Cooney Center and New America co-hosted Fostering STEM Trajectories in Washington, DC. Vivien Stewart, Senior Advisor for Education and former Vice President of Asia Society, delivered these remarks on how an international perspective on STEM education for young children may benefit our research and practices.

An App to Connect Home and School

Educators and researchers have long argued that making connections between home and school learning is key to fostering children’s academic success and strong communities. In Chula Vista, the elementary school district worked closely with parents to design an app to help facilitate communication between families and the school.
